PRESS RELEASE

GREENLEE OFFERS CMT-80 ELECTRICAL TESTER

New electrical tester designed with low impedance input to minimize ghost voltage

ROCKFORD, Ill.— Greenlee introduced its new independently tested UL-3111-1 approved electrical tester designed with an automatic selection feature that's unmatched in the industry. The CMT-80 is Category III 600 volt approved for end-users in residential, commercial and industrial applications.

“The meter knows if the end-user is trying to measure current, voltage, or resistance and takes a current reading and without selecting the function,” said Chera M. Ellis, senior product manager. “The meter can conveniently be clamped around a current-carrying conductor, but still make voltage and resistance measurements since these functions have higher priority.”

The new electrical tester is designed with a low impedance input to minimize ghost voltage. The CMT-80 measures AD/DC voltage, resistance, continuity and AC amperage with the touch of one button. It also has data hold to capture important readings. The CMT-80 is built with a compact design allowing for measurements in tight spaces. Other features include automatic power off for long battery life and an easy to read backlit display for use in low light conditions.

For more information on this new electrical tester from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at www.greenlee.com.
