**GREENLEE'S MULTI-FUNCTION ELECTRICAL TESTERS ARE  
INDUSTRY'S FIRST CATEGORY IV 1000 VOLT RATED**  
*Electrical testers designed for performance, safety, comfort  
and use in multiple applications.*

ROCKFORD, Ill., November 12-13, 2003 — Greenlee's GT-540 and GT-220 multifunction electrical testers are the industry's first to attain a safety category rating of Category IV 1000V. The GT-540 and GT-220 were independently tested according to UL 61010B-1 and IEC 61010-1. The GT-540 and GT-220 feature auto selection mode that allows the electrician to measure AC/DC voltage in low impedance mode, resistance and continuity. These testers are designed to provide the electrician with the ultimate in safety, performance, and comfort in commercial, industrial, utility and residential applications.

“The GT-540 and GT-220 testers are really unique in the industry. We combined the ergonomic design elements of a clamp meter and the convenience of a multimeter into one unit,” said Chera M. Ellis, senior product manager. “We also wanted to combine as many features as possible into one tester. The last thing an electrician needs is another tool to keep track of.”

## Greenlee Electrical Testers/2-2-2-2

The GT-540 provides additional measurement capabilities such as low impedance and high impedance AC/DC voltage, capacitance, diode checks, and low-ohms fast continuity mode. Both testers have an automatic selection mode to measure AD/DC voltage, resistance, continuity and AC amperage with the touch of one button. There is also a data hold feature to capture important readings. Other features include a low battery indicator and an automatic power off for long battery life. Greenlee also offers a lifetime limited warranty with these testers.

For more information on the GT-540 and GT-220 electrical testers, or other test instruments from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988.
